

Lighting made simple

The LED strip that has revolutionized lighting in the construction industry.

Easy to store,
easy to install

We deliver lighting to all of the Nordic countries

Eledge Lighting – The new Nordic brand

With linear LED lighting from ELEDGE, we make installation of temporary lighting easy.

ELEDGE LIGHTING is a Nordic brand of linear LED lighting. We supply lighting to all of the Nordic countries and work with several of the largest actors in the construction and rental industry. Eledge Lighting is owned by the Norwegian company Kreativ Belysning AS.

From years of experience with professional lighting solutions, we have both the equipment and the expertise to deliver competitive lighting systems.

Our goal is to create safe workplaces, prevent accidents and conserve the environment with smart and user-friendly lighting products. This saves both time and money.

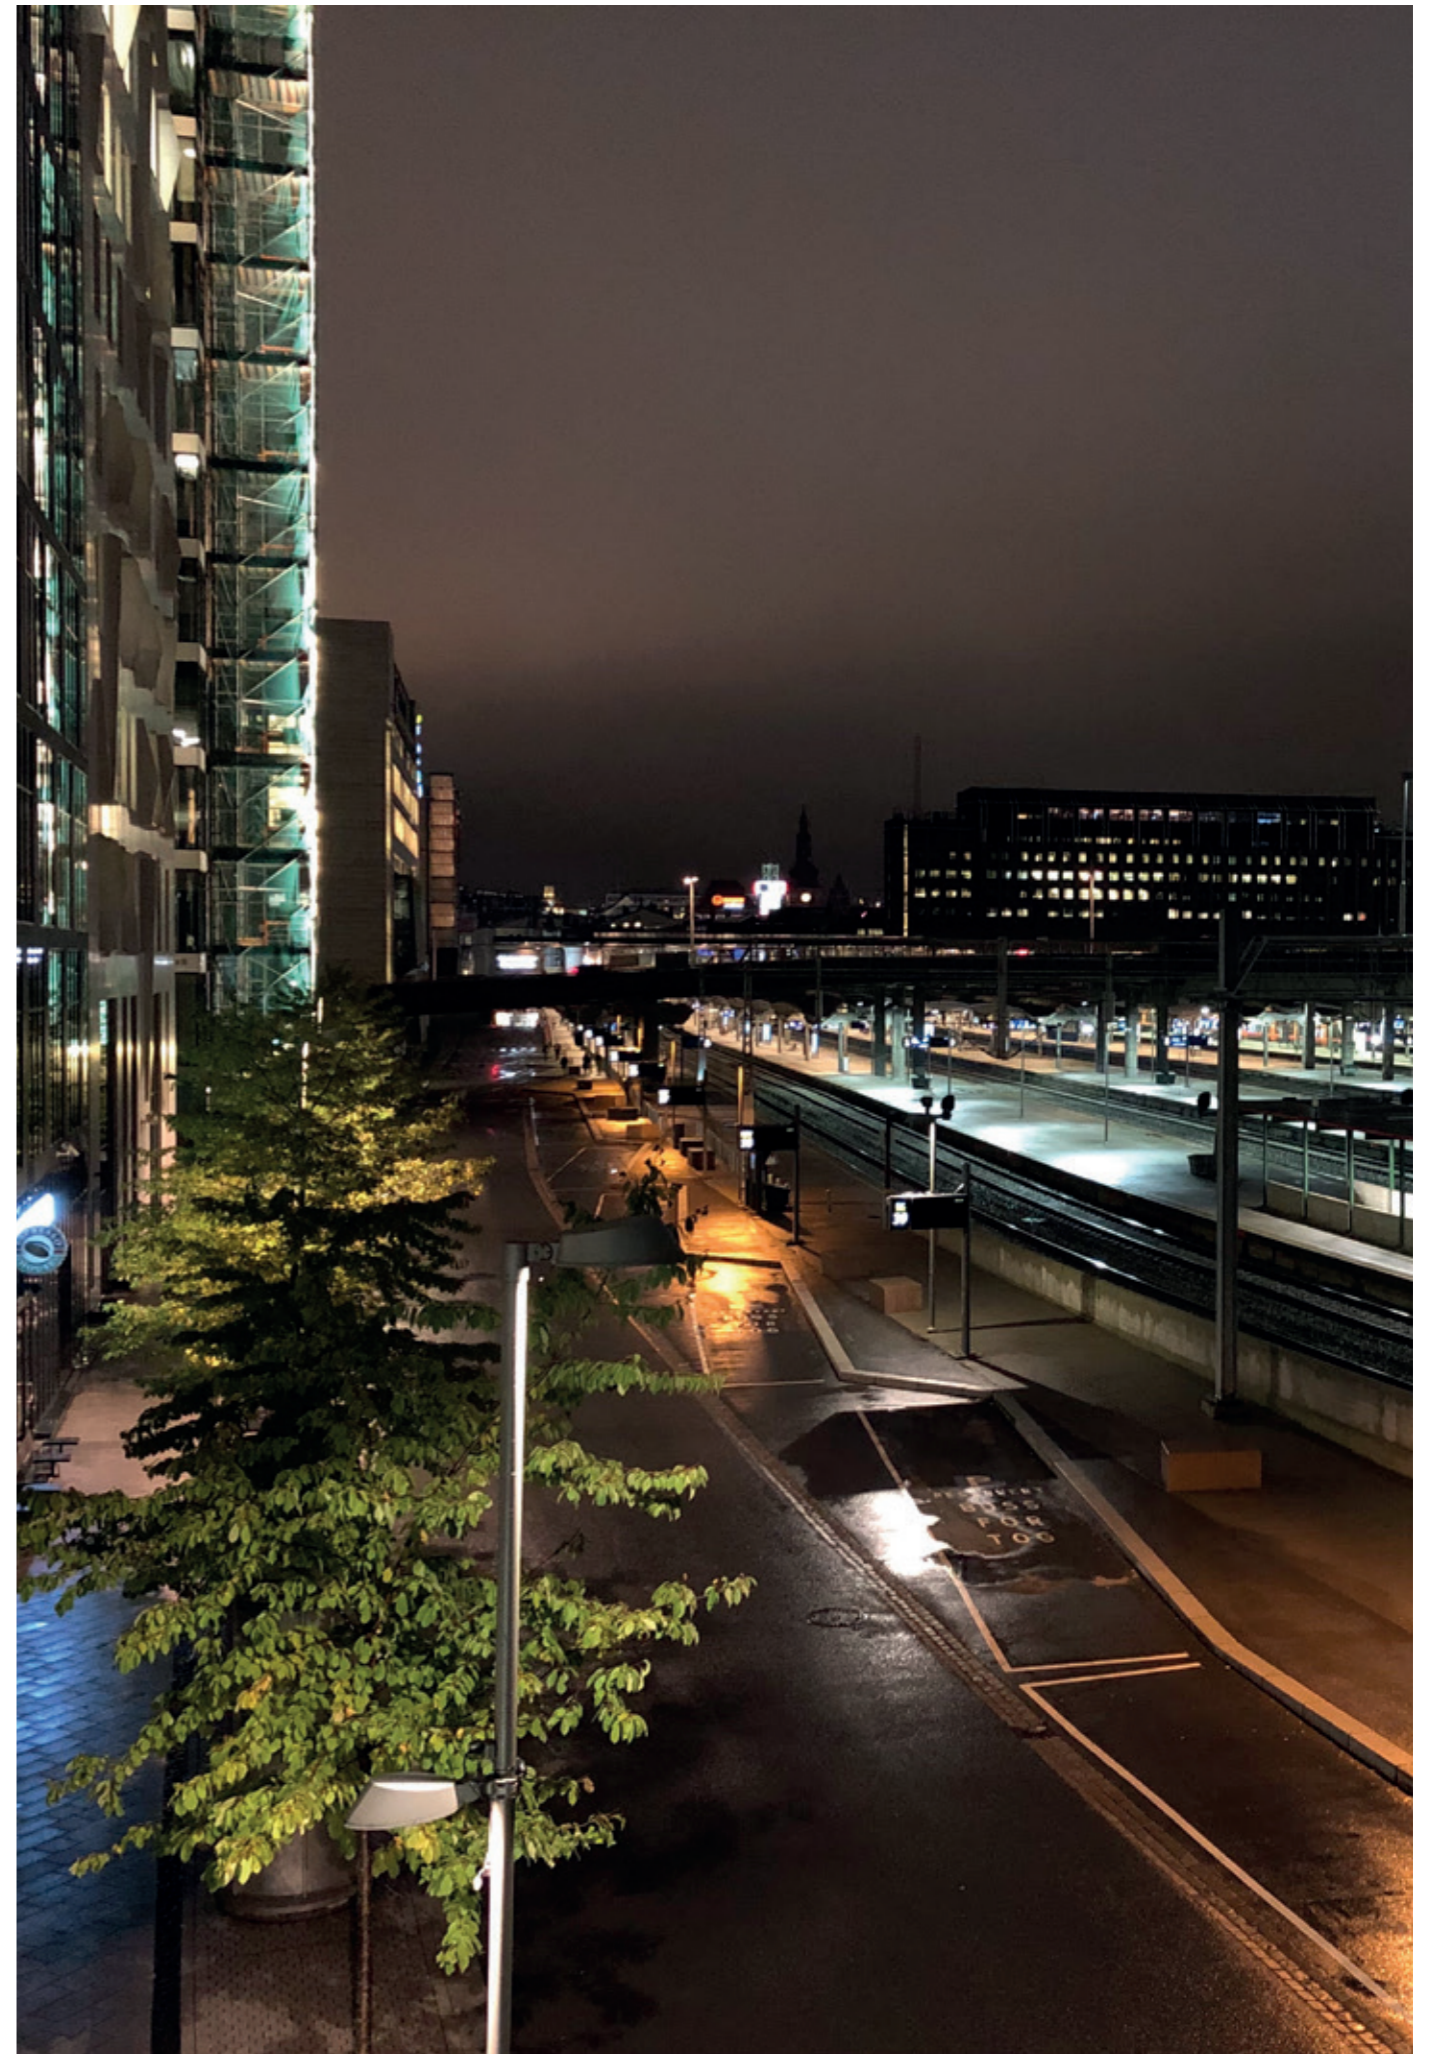

All our products are designed in Norway and produced for the harsh Nordic conditions.

We offer our products through a network of distributors consisting of professional industry leaders within different industries.

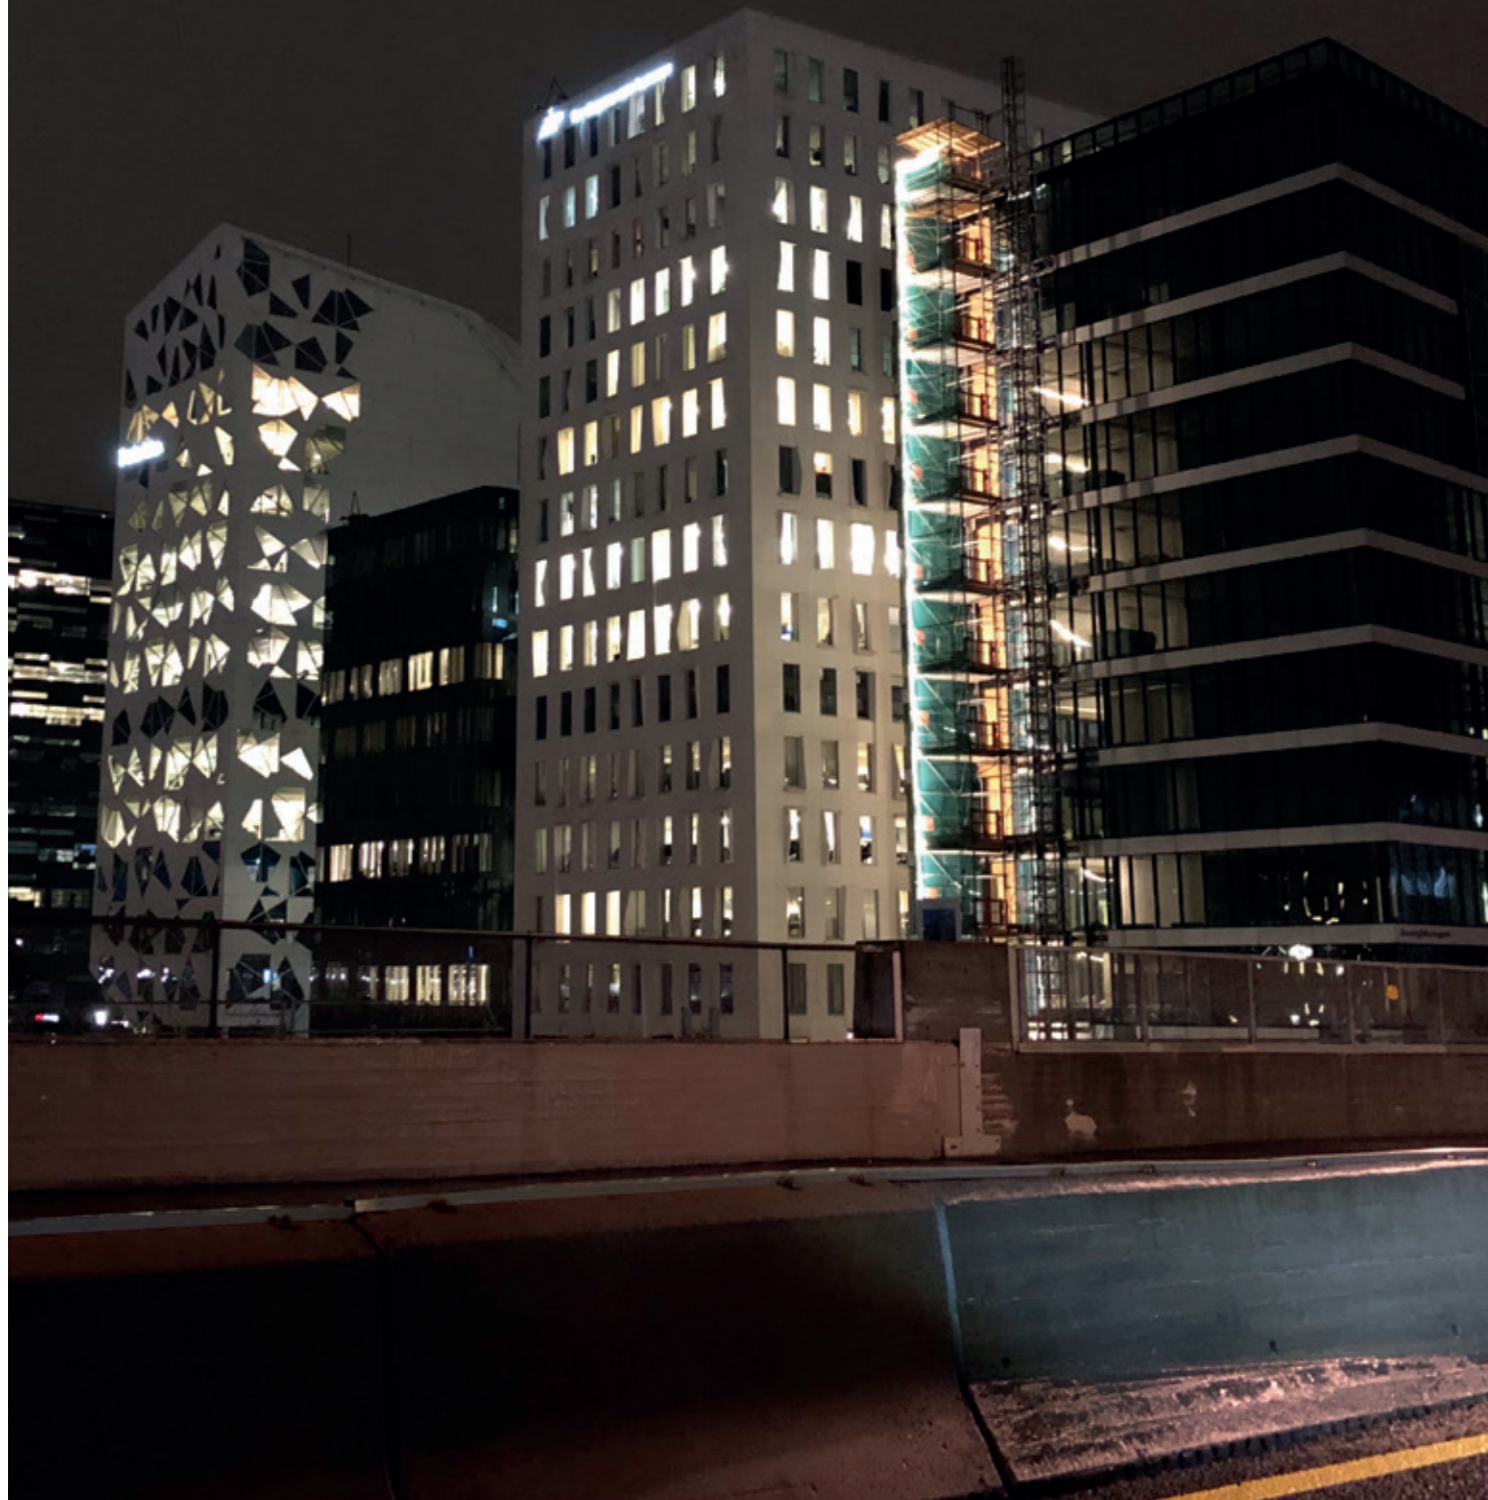

EXPERIENCE AND DEVELOPMENT

We have been working with lighting for many years. We know that technology is constantly changing, and that the development is happening fast. That is why we are constantly working to adapt and improve our products and services.

Our lighting will make the work easier and safer for those who use it. To achieve this, we focus on the details. The Nordic climate requires the highest level of product quality to withstand both cold and harsh conditions.

Powerful, evenly distributed
LED lighting for large
areas. Which product
suits your needs?

The most flexible

MULTIFLEX

Bring it with you anywhere

10 m LED strip

700 lumen per meter

Light, portable and flexible

Art.nr. 156170

Powerflex

Our most powerful and flexible LED strip. Powerflex is designed for the places you need good lighting without sacrificing space. Easy to assemble and even easier to dismantle. Powerflex was the first LED strip developed for construction sites and has completely revolutionized lighting in the construction industry.

Each roll consists of 4,500 high-performance LED's distributed evenly along the length, providing powerful, uniform light along the entire LED strip.

The strip is divided into independent 1m segments. This means that even if a part of the strip should break, the rest will continue to provide light so that the work may continue.

Powerflex is designed in Norway and developed to withstand rough weather conditions and cold winters. Eledge lighting focuses on high-quality products that make the job easier.

User-friendly

Eledge Powerflex is easy to handle, requires no maintenance and is quick to install. It provides enough light for an entire building and can replace several of your old lighting solutions, allowing you

to spend your time and energy on other things.

Example:

Typically, you need a light fixture for every 5 meters to light a storage area.

This means that you would need 5 light fixtures to lighten the same space as our 25 m light strip. Each of these equals the size of one roll of our LED strip. For any project, the LED strip will reduce costs related to transportation, management and storage.

M-flex

Modular LED-strip. M-Flex is a bright and professional LED strip developed with new technology to meet the standards and demands of our clients. You can power up to 150 meters of M-Flex from one power outlet.

Eledge M-Flex is easy to handle, requires no maintenance and is quick to install. With the possibility to connect up to 150 meters, it has the power to light up an entire building and replace several of your old solutions, allowing you to spend your time and energy on other things.

THIS IS M-FLEX

Modular 230V LED strips that can be connected in series up to 150 meters.

This gives endless possibilities - vertically, horizontally and so on. Quick and easy to install, no extra LED driver necessary.

Powerful and evenly distributed lighting. Robust enclosure made to handle tough, Nordic conditions.

Can be used along sidewalks and fences, for exterior building light, warehouses and halls, events and festivals, as well as emergency lighting.

Multiflex

The multi-flexible lighting tool. Extra slim, high lumen LED strip specially developed to save time on installation. This is lighting made simple. Everyone should carry a Multiflex in their toolbox!

Introducing our new Eledge Multiflex 10m LED strip - the new generation 230V LED strips. With its slim and practical drum, Multiflex is easy to carry, making it the perfect tool for any craftsman.

We have made it easy: Simply connect the strip and roll it out. With its 10 meters, this strip can light up an entire room or can be placed around what you are currently working on.

SAVING TIME

One of our primary goals is to make lighting easy. The Multiflex LED strip is specially designed to save time when rigging the lights. All tasks require lighting, and a floodlight isn't always suitable. With Multiflex, you don't have to worry about shadows or whether the light points in the right direction. All you need to do is to pull out the LED strip, connect it and bring it with you wherever you go.

SAVING SPACE

Multiflex 10m is designed to save space. It is produced with a practical drum that is easy to handle. This is the perfect tool to have in your toolbox or your garage. Compared with other types of traditional lighting, this will save you a lot of space.

Example:

Let's say you're going to paint a corridor and you want to make sure the result is flawless. Simply plug in the LED strip and pull out 10 meters of powerful linear light.

Emergency lighting
- Made simple

M-FLEX BATTERY PACKAGE

Safety first! We have made it possible to keep the lights on even when the electricity is out. Our battery package provides enough power for the entire LED-strip, making safe evacuation possible. Produced for the M-Flex series.

M-FLEX EMERGENCY LIGHT LED STRIP

Powerful green light for marketing the exits, making it safe and easy to navigate out of the building. This green LED strip can easily be attached to other M-Flex products.

POWERFLEX BATTERY PACKAGE

Safety first! We have made it possible to keep the lights on even when the electricity is out. Our battery package provides enough power for the entire LED-strip, making evacuation possible. Produced for the Powerflex series.

With linear LED lighting from ELEDGE, we make installation of temporary lighting easy.
